Ref.	OTP2010/000018690	Copies	Mr Klaus Rackwitz Mr Ian Blacker
Subject Objet	Request for access to CaseMap Software in the ICC Court Rooms		

The Office of the Prosecutor (“OTP”) hereby requests the installation of the CaseMap software application on computers installed in the ICC Court rooms for the upcoming trial proceedings against Jean-Pierre Bemba Gombo.

The potential benefits arising from making this software available may be extended to all parties and participants, and include improvements in the efficiency of court room proceedings and the reduction of delays.

The software would allow efficient access to large amounts of factual information arising from the evidence, and it would therefore place the parties and participants in a better position to efficiently address matters of a factual nature raised before the Chamber.

The OTP understands that technical preparations have been made so that ICT is in a position to install the software in the ICC court rooms. Further it is understood that technical installation can be provided by ICT on the basis that parties and participants are “self supporting” in relation to using the application.

The OTP intends to raise this request for consideration in the first eCourt User Group Meeting to take place tomorrow and possibly during the status conference scheduled for 24 September 2010.
