Follow Up Flag: Follow up
Flag Status: Flagged

Dear colleagues,

The Single Judge considers it necessary and appropriate to have the updated version of the eCourt Protocol on the record of the case.

The Single Judge therefore directs the Registry to file the latest version of the eCourt Protocol as soon as possible and no later than Friday 4 September, 16:00.

Kind regards,

[REDACTED]
 on behalf of the Single Judge of Trial Chamber X

Subject: RE: Al Hassan - eCourt Protocol (Status Conference Hearing)

Dear all,

The fields **OTP Registered Path** and **Transaction Data** have been added to the eCourt databases relating to the Al Hassan case.

Indeed, the fields **Pseudonyms** and **Basis of Confidentiality** already existed.

The eCourt Protocol will be updated accordingly.

With kind regards,

From: Dutertre, Gilles

Subject: RE: Al Hassan - eCourt Protocol (Status Conference Hearing)

Dear all,

Many thanks for the positive response to the OTP request to bring amendments to the eCourt Protocol.

Please proceed with the addition of the fields **Pseudonyms** and **Basis of Confidentiality** to the protocol as requested and described by the Chamber, these fields are already added to different eCourt databases.

There are two additional fields requested by OTP to be added to the protocol, **Path** and **Transaction Data** which are defined in the OTP Ringtail as follows:

Path

Type	Memo
Cardinality	One-to-Many
Databases	All
eCourt Protocol	No
Description	Path of the original file including all folders and filename. The path should be added to all records for which an electronic document is extracted
Value	Different for each record

Transaction Data

Type	Memo
Cardinality	One-to-One
Databases	All
eCourt Protocol	No
Description	A catch-all field for relevant metadata (often ESI) formatted with an html line-break delimiter between each metadata value. The metadata should include both the metadata name and the value.
Value	Custom to each dataset.

The **Path** field contains information regarding the storage path of the data before registration, i.e. on a CD or other drive.

We are requesting to please add the **Path** (suggested name for eCourt **OTP Registered Path**) and **Transaction Data** fields to both the eCourt Protocol and the eCourt databases as defined above. The data will be provided only to documents where the values of the fields contain relevant information related to the evidence, mainly for some videos or pictures.

Kind regards

Gilles Dutertre

 Subject: Al Hassan - eCourt Protocol (Status Conference Hearing)

Dear Parties,

In accordance with Trial Chamber X's Instruction given by the Single Judge during the Status Conference Hearing held on 18 February 2020, regarding the eCourt Protocol, please find attached a table with the inputs of CMS/JIMU based on the submissions made by the parties. Could you kindly review the table and communicate back to us any feedback and/or inputs on this matter by 10 March 2020, *if suitable and convenient for the parties*.

Thank you in advance for your cooperation.

Kind regards,
